Charon in the Cloud

Emulate legacy hardware in the cloud. With this Charon solution, businesses can migrate SPARC, VAX, Alpha, and PA-RISC critical applications to the cloud, taking advantage of the same reliable Charon technology for which Stromasys is renowned as well as the many benefits offered by cloud providers.

The packaged Charon in the cloud solution includes one Charon license, as well as support for the Charon license and unmetered cloud services.

THE BENEFITS OF CHARON IN THE CLOUD:

- **LOWER MAINTENANCE COSTS**
  - Replace unreliable hardware with the reliability of the cloud—eliminating those hardware maintenance costs completely.

- **ULTRA-FAST BACKUPS**
  - Benefit from high-speed backup and recovery available in the cloud.

- **ELIMINATION OF RELATED CAPITAL EXPENDITURES**
  - Eliminate the hardware to replace capital expenses with operating expenses, making IT projects and budgets less daunting.

- **HIGHER AVAILABILITY**
  - Nearly 100% availability, removing risk of downtime due to hardware failure.

- **FLEXIBILITY AND CHOICE**
  - Businesses have the freedom to choose their cloud provider, emulating their legacy servers in the cloud platform of their choice.

## PLUS ALL THE BENEFITS OF CHARON SOLUTIONS:

- **REDUCED RISK**
  - Eliminate the risk of unplanned downtime due to hardware failure.
  - Avoid application porting risks: original apps continue to run without modification.

- **LOWER COSTS**
  - Reduce costs of administration and maintenance by eliminating legacy hardware.
  - Lower cost than full migration and often less than a single year's support of the classic hardware.
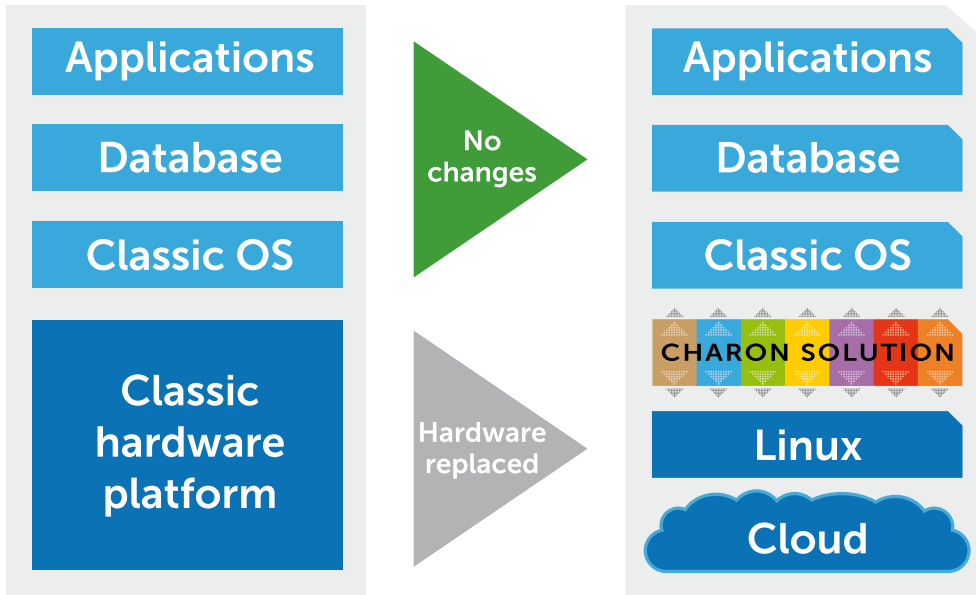

- **PERFORMANCE IMPROVEMENTS**
  - Experience possible increases in application speed; complete tasks in less time.

IMPLEMENTING CHARON IN THE CLOUD

With Charon in the cloud, your original applications, databases, and operating system remain unchanged. There is no modification or recertification required. The original hardware is eliminated, and your applications run as usual on the cloud, with our Charon solution as the translation layer that makes it possible.
